the point I'm trying 2 get across :

r we ever satisfied?

INTIMACY
(sexual, physical
  emotional

dating apps / tech influence :

- anxiety w/ meeting IRL
- who do i message 1st, out of 50 matches
  - do i recycle pick up lines?
  - if i recycle pick up lines, is the "relationship" doomed from the start?
- so many options, so many opps 2 have an intimate moment
  - will i try as hard 2 build the relationship
  - ppl are commodities
  - what is the R.O.I of dedic8ng time + energy 2 messaging + meeting this person I.R.L

anxiety
 / \
meeting   messaging
IRL   from bed
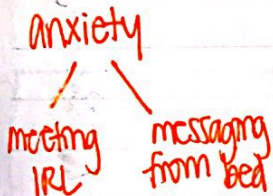

will i spend tht much time building a relationship when they may not be the 1 ?

WHEN I WAS YOUNGER... i expected 2 meet 5ome1 IRL, become friends w/ them, and over the transition our platonic relationship into an intimate 1. sex mount; memorable moment to say the least. i would remember every detail. but now, feck naked, tht moment to each attainable. it's a quantity vs quality thing. the past has grown, but does tht take away from the memorability of the experience?

OUTPUTS

VISUAL

★ 1 trigger makes a bunch of screenshots of a diff dude asking 4 her # appear everywhere
